Course Overview:

Students obtain 40 hours of observation in school-based agricultural education. Students must obtain permission from appropriate administrators and teachers before field observation/experience. For program diversification, observations must be completed at two different school-based agricultural education programs. Students must complete 20 hours at each program (choose a single teacher and a multiple teacher program to do your observations if possible). *Do not observe a first year teacher.* However, you can perform some or all of the following activities: (a) observe classroom teaching; (b) observe activities conducted in school laboratories (shop, greenhouse, school grounds, hydroponics, etc.); (c) observe FFA activities (maximum of 8 hours); (d) confer with school administrators, guidance counselors, other teachers, and so forth; (e) accompany teacher on SAE program supervisory visit (maximum of 4 hours). Additionally, you should have your observation sites approved by Dr. Stripling.
